

**SUV 2007+ Front and Rear  
With and Without Running Board  
Pickup 2007+ Front  
Rear, see Instructions on Bag**

Please read instructions thoroughly before starting.  
Installation time: 30 minutes

**Tools Required:**

#2 Phillips Screwdriver	Hammer
Slit Screwdriver	Center Punch
3/32" (2.5mm), 1/4" (6mm) Drill Bit	Clean Cloth/Rag
Drill	

**Part(s) Contained:**

Description	Quantity
Left hand Splash Guard	1
Right hand Splash Guard	1
#10x3/4" Screw	6
#10 Spring Clip	2
Instruction Sheet	1

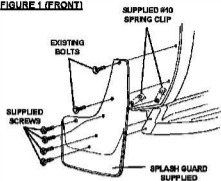

**Note:** Tuning of front wheels to the left or right will allow for additional clearance when installing the splash guards.

**Installation Procedure:**

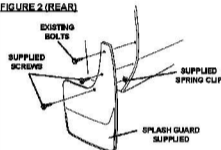

1. Clean and degrease body panel where splash guards are to be located.
2. Identify panel edge push pins. Remove and discard. See Figures 1 and 2.
3. Pull liner forward and install supplied #10 spring clip over panel edge hole. See Figures 1 and 2.
4. If vehicle is equipped with a running board, mark and drill center pilot holes 3/32" (2.5mm) in leading edge of running board. Refer to Figure 1 for position of holes.
5. Temporarily install supplied screw or screws until sealed.
6. Position splash guard over mounting hardware on fender edge and running board, position splash guard so that separation to the road and covering as much of the tire width as possible, while holding splash guard, tap backside with a hammer over each bolt or screw head to leave a mark.
7. Remove the splash guard and all supplied screws. Drill 1/4" (6mm) holes through the splash guard at the marked locations.
8. Install existing bolts and supplied screws. If vehicle is equipped with running boards install screws. See Figure 1.
9. Repeat procedure for other side.
10. Guards can be cleaned with any commercially available cleaner.

**Note:** Drills hardware will be left over depending on front or rear installation.

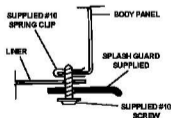

**FIGURE 1 (FRONT)**

**FIGURE 2 (REAR)**

**FIGURE 3 (FRONT/REAR)**

**NOTE:** INSTALL SUPPLIED SPRING CLIPS WITH TURNED UP EDGE ON INSIDE OF PANEL EDGE.
